

## SUPPORTING LEARNERS UPSKILL IN THE NEW NORMAL

Dear readers,

The past eight months have been challenging for Singapore as we battle COVID-19. Many lives and jobs have been affected because of this global pandemic. In this issue of our e-newsletter, we bring together snapshots of how NP CET is supporting the SGUnited Jobs & Skills movement to help Singaporeans upskill and remain relevant and agile as they prepare for their next lap of their careers.

## SGUNITED SKILLS PROGRAMME: JOBS & SKILLS

We launched our SGUnited Skills programme in Programming, Wholesale Trade/B2B and Social Service (Student Coach) in Aug 2020. These programmes ranging from six to 12 months have been designed to help our trainees acquire industry-relevant skills that can improve their employability in these sectors.

We have also gone the extra mile to ensure our trainees get all the support required to get hired or jumpstart their careers after completing our courses. All NP SGUnited Skills Programme trainees will be able to tap on our newly launched **Job Placement Assist (JPA)** initiative to prepare them for interviews, get insights to the sectors they are keen to transit into. Our JPA aims to provide career assistance to our trainees to secure jobs.

## SELF-EMPLOYED PERSONS TRAINING SUPPORT: FOR BUSINESS OWNERS & INDIVIDUALS

Many business owners and individuals are using the current downtime to prepare for work or new business opportunities after Covid-19. To cater to this demand, we have specially curated online courses to support these individuals to upskill and to prepare for them for business recovery. These courses range from Data Analytics, Digital Marketing, Ecommerce and more. Under the **Self-Employed Persons (SEP) scheme**, business owners, for instance, can receive up to **\$10 per training hour** when they sign up for our SEP-approved courses. They are also able to use their one off SkillsFuture credit to off-set their course fees.

Hear what our Learning & Career Ambassador has to say about SEP:

## ENHANCED TRAINING SUPPORT PACKAGE: FOR EMPLOYERS

We know that training employees can be an arduous process, with jobs taken away from staff and work schedules disrupted. However, as the positives vastly outweigh the negatives in the long run especially so with the current pandemic, employees need to seek continuous upskilling to ensure their companies remain competitive in the market. To help employers to get started, companies under the specific sectors are eligible for **Absentee Payroll /Enhanced Training Support Package (ETSP)** at 90% of hourly basic salary, capped at \$10 per hour, and **Course Fee support at 90%** of course fee.

We have courses under two business sectors eligible for ETSP

**Land Transport**  
For Taxi & Private Hire Car Drivers,  
and Private Bus Operators

## THANK YOU FOR THE SUPPORT

"I greatly benefitted from the course as the content taught in classes were **detailed yet easy to understand**. Hand-outs were also given to us so that we can always look back and refer whenever we want to revise on certain topics."

**Kwong Wai Shiu Hospital**

**Course**  
MS Excel and Powerpoint

"The **trainers were extremely helpful and lessons were highly engaging**. They provided effective training to our NEA officers, who could **re-apply what they have learned back on their work produce better results**. Our trainers worked together seamlessly as a team and this course is highly rated amongst NEA officers."

**National Environment Agency**

**Course**  
Monitoring and Sampling of Trade Effluent (Run 2)

"Our trainers are **enthusiastic and passionate in their teaching**, which really helped our adult learners to make **remarkable progress** on their learning journey, especially since the lesson content and assignments are not easy for most of them. We would also like to **applaud NP on their excellent service**. Their prompt responses, openness as well as agility contributed to their achievement of minimal impact during the COVID-19 situation."

**OCBC Bank**

**Course**  
Programming in Python I (Run 4) & Programming in Python II (Run 3)

**What course should I do?**
